1920 CATALOGUE

OF CANADIAN GROWN AND IMPORTED SEEDS, ETC.

In handing you our Catalogue for 1920 we take the opportunity of thanking our customers for their continued support.

We make no apology for this small catalogue. We do not believe in a big expenditure to obtain business, but trust to keeping our customers and to their recommendations by giving the **utmost value in quantity, and of more importance, quality.** If you spend a dollar with us you get a dollar's value, no more no less. We make our prices from the cost to us and do not follow anyone, and we can assure our customers that they will not obtain better value anywhere.

We have been growing and testing seeds right here in Waterloo for 12 years and can say that all the vegetable and many of the flower seeds listed in this catalogue are absolutely the finest and best that are grown. The strains of mangel listed on page 14 are without doubt the finest offered in Canada to-day.

Growing your own seed may save you a few cents, and not that if you count your time. The result may be satisfactory to you, and it may not, so why risk it? Seed growing is the work of an expert. Years and years of experience are needed. Selection must be rigidly maintained. Practically all vegetables and flowers grown to-day are the result of years of constant care and selection. All these plants and flowers would revert back to their original parents—and in a much quicker time than it took to get them where they are—were it not for the strict and constant attention they are subjected to in growing for seed purposes.

Do not be led away by fancy names; a good many of them are only old friends revived. If there is anything real good on the market, we will get it, but only when we are convinced ourselves it is good.

Our seeds are obtained from the best sources, wherever that may be. Some may be grown at Waterloo, others from California, or France, or England. Years of experience have taught us just where to buy, so as to ensure the best results. All seeds are tested for germination on arrival, and later for trueness to type, so that our customers may rest assured of obtaining the very best seeds on the market.

If many orders are held over until the sowing season, a congestion may occur and cause a little delay, but no matter when received, all orders, large and small, receive the personal attention of our principals. Our prices are moderate, our quality of goods unsurpassed, and our methods of business are cordial and helpful.

If you have not already tried our seeds, we ask you as a favor to send 50c for the collection of 6 special varieties offered on page 5, and if you are not satisfied with the results, write and tell us; but we do not expect that. We have enough confidence in our seeds to say that you will be amongst the ever increasing number of our valued customers and friends.

Do not hesitate to ask us about anything connected with the garden or farm. We will promptly and cheerfully send you a reply which will be of value to you.

We know if you once plant our seeds you will become one of our pleased and regular customers—providing you plant them in good fertile soil and give them the proper care and attention.

If you are satisfied, tell your friends—if not, don't fail to let us know.

[W] WATERLOO BRAND

This "brand" still increases in popularity, and we are pleased to say that it has been in every way successful to our customers, nothing better can be had either for table or exhibition purposes. All have been tried in our experimental grounds, and have proven to be the very best in their respective classes. They are brought to your notice as the Waterloo Brand [W] under their original names. Please notice that the cost is little, if any, above the ordinary qualities, for we make it a rule to fix our prices on the cost and not to follow anyone.

AGRICULTURAL SEEDS

Importance of the Root Crop.

It is important that a root crop should be grown on every farm; there is nothing else that can or does take their place. Silage has to some extent taken the place of roots these last few years, but it is neither as good or as nutritious as roots, and for young stock it is important that they should have roots in preference to silage. For dairy cows, mangels are the best, and of mangels there is no other variety just as good as "Our Ideal," and this fine kind will answer as well for all purposes, whether it is cows, horses, pigs, or for fattening cattle.

MANGEL.—Betterave fouragere. Futtermuebe.

MANGEL—"Our Ideal."—Pale yellow skin, and nearly white flesh. Owing to its high nutritious properties and heavy crops, is the cheapest root crop that can be grown. Farmers who have tried this fine variety are enthusiastic about it. We find that the sale of this fine Mangel increases season after season, and we receive many testimonials as to its merits. In selecting, we take the greatest care to insure its trueness to type and density of flesh. The result is roots of the highest feeding value. The cost may be a little more than the ordinary kinds, but we can assure our customers that they will be well repaid. This Mangel was first introduced by us, and the true stock can only be obtained either direct from us or in sealed cartons from our agents. Order early.

WATERLOO GIANT WHITE SUGAR MANGEL

GIANT SUGAR

This is one of our specialties. Large, fine well-shaped roots, growing well out of ground for a Sugar Mangel. Flesh firm and white and very nutritious. The increasing sales of this fine Mangel show its popularity with our customers who appreciate quality. We can honestly say there is no better stock of Sugar Mangel on the market in Canada to-day than the one we offer.

LAWN SEEDS.

Many people have neither the time, means or inclination to make flower beds, but a pleasing effect to the eye can be readily obtained by sowing down a good lawn. Some are deterred by the idea, an entirely erroneous one, that lawns are difficult to establish and maintain. There is certainly a deal of bother in sodding a lawn and the result is often unsatisfactory. Seeding a lawn is much easier and produces better and more uniform results. The seed must be good or the result will be disappointing. We have made up well-balanced mixtures of clean grass seeds of high vitality which we know will produce good results. In making up a lawn, two important things must be considered; the preparing of the soil and the draining of the ground. The beauty of a lawn consists in the evenness of its surface and the richness of its verdure. The latter can only be produced on well-drained soils. For most soil, drains 30 inches deep are ample, and the distance apart depends on the nature of the soil. Be sure that the depth of soil is uniform. The ground should be dug to an equal depth, apply a good dressing of old manure. Then it should be rolled, then raked two or three times until the surface is levelled. Sow the seed thickly at the rate of 1 lb. to every 300 square feet, rake the seed in lightly and finally roll firmly. Do not mow the lawn too closely the first two or three times, especially in hot weather. Roll frequently, thus assuring a close, compact growth. In the early spring and fall apply our special Lawn Fertilizer, at the rate of 2 or 3 ozs. a square yard.

Victoria Mixture.—The best yet offered, will produce a beautiful and enduring turf. Packet 10c., lb. 45c., 10 lbs. \$4.25.

Canadian.—(Quick growth). A fine mixture that will produce a lasting turf in the shortest time. Packet 10c., lb. 35c., 10 lbs. \$3.25.

We prepare all mixtures ourselves and can guarantee them as being most suitable for Canadian climate. All mixtures have the proper proportion of clover, if wanted without, please say so. If you want any for a special purpose, write us for information and prices.

Lawn Fertilizer.—Prepared from a celebrated English formula, and can only be obtained from us. Cleaner and better than manure. Lb. 10c., 10 lbs. 75c.
